PROFESSIONAL SUMMARY

Full Stack Engineer with 2+ years of experience designing, developing, and deploying scalable, production-ready web and mobile applications using the MERN stack. Proficient in React.js, React Native, Next.js, Node.js, Express.js, MongoDB, PostgreSQL, and Firebase. Experienced in RESTful APIs, GraphQL integrations, real-time notification systems, third-party payment gateways, and role-based access control. Proven track record delivering end-to-end features in agile, remote, cross-functional teams.

TECHNICAL SKILLS

Frontend Development : React.js, React Native, Next.js, Redux, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, Bootstrap 5, Material UI

Backend Development : Node.js, Express.js, RESTful APIs, GraphQL

Databases : MongoDB, PostgreSQL, Firebase Firestore

Programming Language : JavaScript (ES6+)

Tools and Platforms : Git, GitHub, Firebase, FCM, Razorpay, OpenMoney, Sendgrid, Google Maps API, Directus, AWS S3, JWT

Core Competencies : Agile Methodology, Remote Collaboration, Code Review, Cross-functional Teamwork, Problem Solving

PROFESSIONAL EXPERIENCE

APIE TECH — Bhubaneswar, Odisha | Remote

Full Stack Engineer | December 2024 – Present | 1 Year 6 Months | Full-time

- Architect and deploy scalable, production-ready web and mobile applications using the MERN stack.
- Develop and maintain full-stack features across React.js and React Native frontends and Node.js/Express.js backends.
- Collaborate with cross-functional remote teams to define technical requirements, implement features, and conduct code reviews.

Project: CFLRS – Foundational Learning Reporting System

- Designed and integrated the Schools module UI within FLNSight, a government education analytics platform.
- Enabled data-driven insights on student learning outcomes through seamless REST API integration.

Tech Stack: React.js, Redux, Node.js, Express.js, MongoDB

Project: IPEL – Digital Repository

- Built REST API integrations for a centralized repository managing project documents, resources, images, and videos.
- Developed real-time dynamic dashboards to monitor and visualize key project initiative metrics.

Tech Stack: React.js, Redux, Node.js, Express.js, MongoDB

Project: Pickup Ninja – Hyper Local Delivery Service |

[Play Store](#)

- Developed three application modules — Booking App, Rider App, and Admin Panel — for a hyperlocal pick-and-drop platform with real-time GPS tracking via TOOKAN API.
- Implemented FCM push notifications, Sendgrid email alerts, OpenMoney payment gateway, and Google Maps API for a seamless end-to-end delivery experience.

Tech Stack: React.js, React Native, Next.js, Node.js, Express.js, Firebase Firestore, FCM, Sendgrid, Google Maps API

Project: Samadhan – Citizen Grievance Platform |

[Play Store](#)

- Built a full-stack citizen grievance platform with OTP-based phone authentication, complaint posting with media attachments, real-time status tracking, anonymous stealth-mode reporting, and multi-language support (English, Hindi, Odia) across React Native mobile and React.js admin panel.
- Developed admin and social worker modules with role-based access control, comprehensive analytics dashboard, master data management, complaint approval workflows, user verification, and export functionality.

Tech Stack: React Native, React.js, Node.js, Express.js, MongoDB, JWT, AWS S3, Firebase Cloud Messaging, SendGrid, MSG91

Project: Velvet Bai – Home Services Platform

- Engineered end-to-end booking flow, earnings-to-transactions module, SOS functionality, job lifecycle management, Razorpay payment integration, and a dynamic service provider rating and review system for dual user and provider roles.
- Developed a comprehensive admin panel with analytics dashboard, dispute resolution, promotional code engine, exportable reports, real-time FCM push notifications, and a fully responsive role-based web application at scale.

Tech Stack: React.js, React Native, Redux, Node.js, Express.js, MongoDB, Razorpay, FCM

Project: Novaite – AI-Driven Digital Solutions Platform

- Integrated GraphQL APIs to unify data flows between frontend components and backend services.
- Contributed to automating business operations and enhancing customer engagement using Directus CMS.

Tech Stack: React.js, GraphQL, Directus

Project: Contractr – B2B Manpower Marketplace Platform | [Live Demo](#)

- Developed a full-featured B2B Manpower Marketplace with three separate portals for Vendor, Company, and Admin users featuring role-based protected routing and responsive design.
- Built user management modules with dashboards, application tracking, contract management, job postings, revenue tracking, and real-time notifications; resolved critical bugs across authentication flow, routing, and UI rendering.

Tech Stack: React.js, Redux Toolkit, React Router v6, Tailwind CSS, Framer Motion, Lucide React

Project: A365 – Advanced Software Solutions Platform | [Live Demo](#)

- Built a multi-page corporate web platform for a software solutions company offering IT consulting, cloud solutions, and cybersecurity services to 500+ clients across 25+ countries.
- Developed a scalable Next.js-based frontend with optimized static assets, custom branding, enterprise/SMB solution tiers, and a lead generation contact flow.

Tech Stack: Next.js, React, CSS, Responsive Design, SEO Optimization

Project: SuperGlassEast FL – Windshield Repair and Glass Restoration Platform | [Live Demo](#)

- Developed a full-stack business website for a certified mobile glass restoration franchise with dedicated service pages covering windshield repair, fleet services, boat glass, and aquarium restoration.
- Integrated SEO-optimized metadata, Open Graph tags, mobile-first responsive design, and lead generation features including free quote CTA and click-to-call functionality.

Tech Stack: HTML, CSS, JavaScript, Responsive Design, SEO

CODEKART — Bhubaneswar, Odisha | Remote

Web Developer Intern | December 2021 – July 2022 | 8 Months | Internship

- Developed responsive, accessible UI screens and Single Page Application modules as a front-end developer.
- Delivered modular, reusable React components with clean, maintainable code following industry best practices.

Project: CKARE – Clinic Management Web Application

- Designed and developed a full-featured clinic management SPA enabling service delivery to Pro and Member users.
- Implemented payment gateway integration and barcode generation to streamline clinic operations.
- Team Size: 7 Members

Tech Stack: React.js, Redux, Bootstrap, Material UI

Project: POLITIX – Political Video and Live Streaming Platform

- Built a video and live-streaming platform for US political news enabling user-generated and moderated video content.
- Developed features for content creation, live broadcasting, and content moderation to democratize political journalism.
- Team Size: 8 Members

Tech Stack: React.js, Redux, Bootstrap, Material UI

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science and Engineering — August 2020 – August 2024

Roland Institute of Technology (RIT), Berhampur | CGPA: 8.5

Class XII – Central Higher Secondary Education (CHSE) — 2020

Binayak Acharya College, Berhampur, Odisha | Score: 65%

Class X – Board of Secondary Education (BSE) — 2018

Sri Aurobindo Integral Education Centre, Berhampur | Score: 80%
